

**Albam, a Human Capital Management Software from South Korea will be showcasing its groundbreaking Time Attendance Solution in Future Commerce Indonesia.**

*“The average Human Resource Manager spends 45 minutes a day to calculate time attendance and payroll. With Albam, time is reduced by 70% to only 15 minutes” - Tech In Asia*

Blue Night Corporation, the company behind Albam; a revolutionizing Time Attendance / Shift/ Payroll Software that helps seamlessly automate and simplifies Human Resource is set to showcase its product at Future Commerce Indonesia that will be held in Jakarta, Indonesia. Within 4 years after its initial founding in 2015, Albam has gained high tractions in its founding country and is currently the 1st HR SaaS provider in South Korea. It now has more than 50,000 + corporate users in more than 20 countries. The solution provides a free lifetime service for its popular Time and Attendance version for its app.

The HR Management startup offers solution to the issues experienced by most business managers and owners, from checking daily attendance that can take as long as 45 minutes a day to bookkeeping and payroll accounting that can take another 12 hours monthly. Things might get even trickier for entrepreneurs who have no dedicated manager for Human Resources and Operations, and more than one outlets to manage. With the average amount of time needed on dealing with the tedious HR problems, business owners could use a time-efficient solution that can enable them to put more time in maximizing their sales and better strategies for the growth of the company.

This is where Albam shines, the HR solution came in at a fraction of a costs compared to other HR Time & Attendance solutions which require costly hardware purchases of Attendance machines & training of IT personnels that may costs company thousands of dollars yearly. The service provides affordable accessibility for SMBs & enterprises through a secured cloud based solution by turning your everyday mobile devices' into a clock in/out device therefore replacing more traditional forms of attendance solutions which includes physical cards, fingerprints and paper based attendance method. With cloud, users' data can always be recovered even in the event of loss of devices. The solution even came in with an optional Albam device that is provided for free\* (International Shipping costs included) for Albam's users.

Albam's offering came in 2 versions of Apps that are available both for IOS & Android, one for HR Managers and the other one for Staffs. With the manager app, business owners & HR personnels are able to assign employees' working hours, set schedules, view overall employees' working statistics from lateness, number of check-in times and overtime information. Albam also facilitates the creation of multiple stores for corporates that have many branches, each controlled by administrators that hold different levels of authority as per assigned by the owner/HR manager of the company. On the other version; the Staff App allows employees to clock in and clock out directly from their cell phone, see their work info, records and even request to amend them with permission from their manager.

Albam's US patented service gives a unique proposition in the market that differentiates it apart from other HR SaaS providers in the market that uses Fingerprint based solutions or GPS based location for attendance solutions which are prone to location manipulation & buddy punching. Its unique system prohibits users from checking in & out of their working place from outside the workplace proximity with the help of the complementary Albam device, thereby preventing fake attendance checks and ensuring unparalleled accuracy for its users. In addition, The solution is empowered by sophisticatedly made algorithms that enable real-time Attendance and Staffing management simple for everyone.

Albam's users ranges from SMBs to Corporate Enterprises which includes big names in the retail market such as Daniel Wellington and Giordano to small SMBs like Coffee shops. After receiving its A series of Investment of around 2.5 million US dollars in June 2018, the company now has big plans for its expansion in the APEC market. With Indonesia, as one of the main potential markets that the company is eyeing for. By joining Future Commerce Indonesia, the company hopes to introduce its groundbreaking products and service to local startups and SMBs. "Through Albam's presence in Indonesia, we hope to accelerate and aid the Indonesian government in achieving its goal for their e-Commerce roadmap by helping local businesses in reducing their operation costs and time. This will effectively translates into higher yields in both productivity and efficiency." addressed Jinyong Kim, CEO of Blue Night Corp.
